Remarks:

Applicant appreciates the Examiner's time and his indication, in an interview relating to the parent application, that the claims are allowable in view of the prior art. In order to resolve the double patenting rejection, the parent application will be abandoned, with the claims from the parent application now being made in this application.

In the telephone interview relating to the parent application, the Examiner made reference to U.S. Patent 3,925,972 "Andersson", indicating that the plate 27 could be considered to be a shroud. Claims 1 and 15 have been amended to further define the shroud as having top, left and right surfaces that enclose the top and left and right sides of the opening, thus distinguishing from Andersson.

It should also be noted that this application claims priority from a provisional application that was filed on April 4, 2002, prior to the June 25, 2002 filing date of U.S. Patent 6,609,358.

Applicant believes that all the claims are now in condition for allowance. If there are any other problems that need to be resolved, Applicant's attorney would appreciate a call from the Examiner in order to expedite their resolution.

Respectfully submitted,

Theresa Fritz Camoriano
